## How safe is your facility? Is the electrical and plumbing reliable? Does your facility meet the recommended minimum safety requirements?

Our facility assessment practice enables you to measure student safety, provides definitive investment direction, and a clear vision for making your letters come to life.

## Is your home equipped to enable the experience you envision for your collegiate members?

Make that determination with our assessment. When you receive our analysis of your facility's health and competitiveness, it will include an immediate action item list and five-year capital improvement recommendations. Your team will be equipped with an overview, along with a definitive direction for where and when to invest.

Stop the days of wondering about what you don't know and continuously recalculating the strategic and financial direction of the chapter facility. You need, and your residents deserve, sound investment direction and a clear vision for advancing your chapter house on campus. We help provide both.

## ASSESSMENT TEAM

### Jeff Peterson

*Director of Assessments*

Beta Theta Pi

Middle Tennessee State University

### Tim Stephenson

*Assessment Specialist*

Lambda Chi Alpha

Elon University
